## **A little bit about us:**

Global Electric Services was originally started 10 years ago in Durban and has recently returned from a 5 year stint in the UK, where there is a Global Branch currently still in operation. We have spent two years re-adjusting to the South African market and establishing a solid infrastructure to ensure that we provide a professional service.

## **Our Aim:**

Our aim is to build a handful of good relationships with Architects, Builders, Designers and Corporate Companies where we can offer them a professional service and prioritise them. Whilst in the UK, we found structuring our company like this worked extremely well.

## **What we do:**

Our service includes all domestic and commercial installations:

- Call-outs (fault-finding, tripping problems)
- Small electrical alterations
- Renovations / Extensions
- New Developments
- Garden and security lighting
- We are available if you need input or ideas on your electrical design.
- Re-labeling and Tracing of all electrical circuits (Electrical installations are often incorrectly or obscurely labeled. By tracing and re-labeling correctly, we create an environment in which our clients can have peace of mind regarding their homes or offices. This also makes any future electrical work efficient and cost-effective)
- Advice on electrical energy-saving

## **Our Work Ethics:**

- Friendly and well-mannered tradesmen

- Prompt quoting and invoicing
- Accurate, fair pricing
- Punctual and reliable service
- To use the correct tools and material for each job
- High quality, efficient, neat and tidy workmanship
- Committed to building long term relationships with all of our clients.

## **References:**
